9

An aerial view of a game map, likely from a survival or strategy game. The terrain is a mix of green grass, brown dirt paths, and clusters of trees. In the foreground, a red square highlights a specific area on a hillside, possibly indicating a point of interest or a resource location. The background shows rolling hills and a clear blue sky.

DISCLAIMER & ACKNOWLEDGEMENTS

- I am not a military pilot. I'm a VFR pilot, so my knowledge of some of the systems referenced is limited.
- This document is based off my own review of the represented theatre plus open source documents on the airfields
- Graphics are largely my own design. Exceptions include but potentially not limited to the cedar, kangaroo, maple leaf & Moroccan crown which came from Wikipedia as public source items.
- This document is intended for sim use only, I have not tried to create proper IFR approach plates and added a graphic to represent IFR info on the chart. Everything else should look familiar.
- As much as possible taxiways are drawn from a tour of the airfield, I have left out some of the A/B segments for specific taxiways for space considerations on the diagrams
- At present all diagrams are oriented North Up.
- Where there are no taxiway markings on a field I have done a clockwise assignment for simplicity. If you have a human ATC with these charts and you have them, then you should be able to use them
- If your squadron is using these out of their original format/naming, please contact me on the forums and let me know. I don't mind but do like to keep a vague track of where my work is.
- Any errors can be reported through the forums. This is a large effort so I don't pretend they are 100% accurate.
- Many thanks to Ugra media and Eagle Dynamics for the awesome map.

SPECIFIC ACKNOWLEDGEMENTS

@Maestr0 For the feedback and advice on what's coming up on the map

@Bailey For the awesome work documenting helipads and airfield frequencies.

@Sirrah For providing screenshots of Helipads

Please Enjoy! CombatWombat APR 2021
